# Christian López Agardi

Business Intelligence Analyst · Python · SQL · Power BI · Data Automation

lopezagardi@gmail.com · +34638157099 · Berlin, Germany · https://christianlxpez.github.io/ · LinkedIn

## Summary

Business Intelligence Analyst with a double degree in Computer Engineering and Business Administration. I bridge the gap most BI profiles cannot: I understand the data pipeline end-to-end and I understand the business impact. Experienced in building automated data extraction systems in Python, structuring databases, and transforming raw data into actionable insights. Currently completing the Microsoft Power BI Data Analyst Professional Certificate and Andrew Ng's Machine Learning Specialization. Seeking BI Analyst, Data Analyst, or Analytics roles in Berlin and remote environments.

## Education

University of Alicante — Double Degree in Computer Engineering & Business Administration and Management — 2017-2025

HWR Berlin — Double Degree in Computer Engineering & Business Administration and Management — 2021-2022

## Experience

**INHUB** — Alicante, Spain
Software Developer → Data Engineer — 2022 - 2024

- Built Python-based web scraping pipelines (Selenium, BeautifulSoup) extracting structured data from multiple sources daily, fully automated, zero manual intervention.
- Designed and maintained automated storage workflows feeding MySQL databases and Excel reports, centralizing multi-year historical datasets into a single queryable source of truth.
- Improved data processing efficiency by eliminating redundant manual steps, increasing accuracy and reducing turnaround time for data-driven decisions.
- Led small cross-functional projects: scope definition, task coordination and KPI tracking to ensure on-time delivery.

## Projects

**Automated Data Extraction & Storage System** · Python · Selenium · MySQL · Excel

- Engineered a daily automated pipeline extracting structured data from multiple web sources, eliminating manual processing entirely.
- Consolidated multi-year historical data into a centralized MySQL database, enabling fast querying and trend analysis.
- Improved data accuracy and freed analyst time for higher-value analytical tasks.

**PawLife** · AI-Powered Mobile App · Node.js · Express · Expo · Firebase Firestore · NoSQL

- Designed and built a hybrid mobile app integrating intelligent algorithms to generate personalized health plans for pets.
- Architected the data layer using Firebase Firestore: structured schema design, authentication and real-time data synchronization.
- Solely responsible for full-stack technical development and end-to-end business strategy (market analysis, financial projections, go-to-market plan).

## Skills

**Software Development**
Python (Automation; Web Scraping; Data Processing), React Native, Node.js, JavaScript, CSS, Java, HTML, C/C++

**Data & Analytics**
SQL, Microsoft Excel, Data Automation & ETL, Firebase, Power BI (in progress)

**AI & Machine Learning**
Machine Learning fundamentals (in progress)

**Business & Management**
Project Leadership, Strategic Planning, KPI Tracking & Reporting, Cross-functional teamwork

## Certifications

First Certificate in English (B2) — October 2019
Cambridge

No-Code AI Agent Builder (n8n) — October 2025
Simplilearn

Microsoft Power BI Data Analyst Professional Certificate — In progress | Feb - Apr 2026
Coursera

Machine Learning Specialization — Planned | Apr 2026
Andrew Ng
