

AI Automation Engineer who builds systems that eliminate manual work — not dashboards that describe it. I design and ship end-to-end automation using **n8n, Python and LLM APIs like Claude**, backed by a double degree in Computer Engineering and Business Administration that lets me translate business processes directly into working workflows. Currently running automation projects for hospitality businesses: self-managing booking flows, AI-drafted review responses, and lead-qualifying chatbots. Remote-first, open to relocation.

EXPERIENCE

AI Automation Consultant — Independent

Remote · 2025 — Present

- Designed and deployed end-to-end n8n workflows integrating the Claude API to automate reservation handling for hospitality clients, cutting manual front-desk admin.
- Built AI agents that draft and publish on-brand responses to guest reviews across platforms, reducing response time from days to minutes.
- Automated lead capture and qualification flows connecting website forms, WhatsApp and email — routing only qualified leads to the sales team.
- Delivered customer-facing chatbots handling FAQs, booking status and upsells, reducing repetitive support tickets.

Software Developer / Data Automation — INHUB

Alicante, Spain · 2022 — 2024

- Built Python-based automated pipelines (Selenium, BeautifulSoup) extracting structured data from multiple web sources and file formats daily — fully automated, zero manual intervention.
- Automated daily ETL processes running on remote servers, centralizing multi-year historical datasets into MySQL and Excel reporting systems.
- Improved data processing efficiency by eliminating redundant manual steps, increasing accuracy and reducing turnaround time for decisions.
- Worked closely with technical teams, management and clients to adapt data solutions to changing business requirements.

PROJECTS

n8n Automation Templates — Hospitality

n8n · Claude API · Webhooks · AI Agents

Reusable n8n workflow templates automating reservation handling, AI-drafted review responses, lead qualification and support chatbots — built to clone and deploy client by client.

SocialDrink — Real-Time Social Matching

React Native · Next.js · Supabase · PostGIS

Mobile-first platform matching people in real time for spontaneous meetups, with live location-based discovery. Built the cross-platform app and backend architecture end-to-end, including real-time geospatial queries.

Business Process Analyzer — AI Agent

Python · Gemini API · AI Agents

Terminal AI agent that analyzes any business workflow in free text and returns named automation tools, complexity and ROI estimates — structured JSON output.

PawLife — AI Mobile App

Node.js · Expo · Firebase

Hybrid mobile app for pet wellbeing with AI-personalized health plans. Sole owner of the data architecture (Firestore) and go-to-market strategy.

SKILLS

AI & Automation — n8n, Claude API, LLM Integrations, AI Agents, Workflow Automation, Webhooks, API Integrations

Programming & Data — Python, JavaScript / Node.js, SQL, React Native, Selenium, REST APIs

Business — Client Discovery, Process Design, Business Analysis, Cross-functional Collaboration

CERTIFICATIONS

No-Code AI Agent Builder (n8n)

Oct 2025

Simplilearn

MS Power BI Data Analyst Professional Certificate

Apr 2026

Coursera / Microsoft — in progress

Machine Learning Specialization

Aug 2026

DeepLearning.AI / Andrew Ng — planned

EDUCATION

Computer Engineering & Business Administration

2017 — 2026

University of Alicante — dual degree

Exchange Program — Business Administration

2021 — 2022

HWR Berlin
