Summary

SUMMARY

Computer Engineering and Business Administration graduate passionate about connecting technology, innovation and business. I enjoy tackling unfamiliar challenges, understanding real business needs and turning them into practical solutions through software development, AI and process automation. With a problem-solving mindset and a strong willingness to learn, I'm driven to explore new technologies, improve existing processes and build solutions that create measurable business value.

Education

University of Alicante — Dual Degree in Computer Engineering & Business Administration
Alicante, Spain • 2017 – 2026

HWR Berlin — Exchange Program
Berlin, Germany • 2021 – 2022

Experience

INHUB — Alicante, Spain
Data & Automation Engineer — 2022 – 2024

• Built automated Python data pipelines using Selenium and BeautifulSoup to extract, process and structure data from multiple web sources and file formats.

• Designed ETL workflows to clean, transform and standardize large datasets used in AI-driven forecasting and business analysis.

• Automated recurring data collection and processing workflows running on remote servers, eliminating manual intervention and improving reliability of daily operations.

• Integrated automated data pipelines with MySQL databases and Excel reporting systems, maintaining continuously updated historical datasets for business decision-making.

• Worked across technical and business contexts, translating changing requirements into practical data and automation solutions and coordinating with management, clients and technical teams.

Projects

Automated Data Pipeline
Python · Selenium · BeautifulSoup · SQL · MySQL · ETL

Developed an automated data extraction and transformation pipeline collecting information from multiple web sources, centralizing historical datasets in MySQL and eliminating repetitive manual processing.

PawLife — AI powered Mobile Application
React · Node.js · Expo · Firebase

Designed and developed a hybrid mobile application for personalized pet care recommendations. Responsible for the technical architecture, data layer and full-stack development, while also defining the business strategy, financial projections and go-to-market approach.

AI Automation Workflows - n8n
n8n · Claude API · Webhooks · AI Agents

Developing practical skills in workflow automation and AI integrations through self-directed projects based on business use cases, including lead qualification and customer review workflows. Focused on learning how to connect APIs, structure workflows, handle errors and validate automated processes.

Skills

AI & Automation
AI Agents, LLM Applications, Prompt Engineering, n8n, Workflow Automation, API Integrations, Webhooks, Process Automation, RAG Fundamentals

Software Engineering
Python, JavaScript, Node.js, React, React Native, REST APIs, Git/GitHub, Selenium, BeautifulSoup

Data & Business Intelligence
SQL, MySQL, ETL, Power BI, DAX, Excel, Data Modeling, Data Visualization

Business & Solutions
Business Analysis, Process Design, Requirements Analysis, KPI Tracking, Product Thinking, Market Analysis, Technical Problem Solving, Cross-functional Collaboration

Energy & Sustainability
Energy Management, Energy Auditing, Building Energy Efficiency, Industrial Energy Efficiency, ISO 50001

Certifications

No-Code AI Agent Builder - n8n — 2025
Simplilearn

Microsoft Power BI Data Analyst Professional Certificate — 2026
Microsoft / Coursera

Python Programming Fundamentals Specialization — 2026
Madecraft / Coursera

AI Automation Engineer with n8n Specialization — 2026
LarnKartS / Coursera

Expert in Energy Management — In Progress
AENOR
Energy efficiency in buildings · Industrial energy efficiency · Energy audits · ISO 50001
